

KLEEN-GARD[®]

HE SERIES GREASE FILTERS

Research Product's High Efficiency (HE) Series Kleen-Gard grease filters are perfect for medium to heavy duty grease loading applications. Designed with an inner frame assembly, Kleen-Gard HE Series grease filters can upgrade existing hoods to achieve grease removal efficiency to over 80% of particulates of 8.5 microns or higher.

Higher Performance & Higher Standards

- + Upgrade efficiency of existing hoods to over 80% for particles of 8.5 microns or higher
- + Best value compared to other HE filter types in the market
- + Superior performance for cleaner exhaust ducts
- + Increased applications: charbroiling, fryers, combination gas ovens, griddles, up-right broilers
- + Easy cleaning: hot water and dish soap can clean standard grease build up
- + Available with #944 Snap-In handles or #995 Locking handles for easy installation
